Since 4 years the band ODD SHOT from Berlin has been working on their individual and original concept.

On their first CD: „Oscar & Emma“, which was released in June 2005 on Konnex-Records (KCD 5154) in Berlin, you can see their special qualities pretty clearly:

The band around Roland Fidezius is very authentic and expressive. The compositions of the bass player consist of concise melodies and unusual rhythms and leave space for creative improvisation. A very individual band-sound, which lets the characters of the musicians shine through, has developed over the time.

Quotes from the Berlin Press:

*Convincing. ODD SHOT are the evidence of how the Berlin jazz-scene supports its offspring. (Berliner Zeitung)*

*It only took one year till the band of the bass-player and composer Roland Fidezius found its individual sound full of authenticity and expressiveness. Instead of letting it go, the band members indulge themselves in vivid interaction of trumpeter Richard Koch and saxophonist Benjamin Weidekamp. Roland Fidezius and drummer Rudi Fischerlehner are in charge of the solid Groove. (Zitty, calendar of Berlin events, Tip of the day 06/01/03)*
